# Allowance

## A company card for AI employees.

Spending limits for AI agents, enforced on-chain.

**Anthony Beaumont** · Encode Club × Saint · London

THE PROBLEM

# Agents can do the work. They can't pay for it.

### 1 Checkouts block bots

Secure card iframes, CVC fields, 3-D Secure and bot checks stop automated entry.

### 2 Unlimited risk

Hand an agent a card number or a hot wallet and its limit is your whole balance.

### 3 A human steps in

The automation stops at the very last step, and someone has to finish it by hand.

THE INSIGHT

# The work is done. Except the payment.

This month, **Saint's AI employees** regularly got all the way to checkout on real purchases, then stopped at secure card fields, CVC boxes and 3-D Secure.

**A human had to step in** to finish the job.

### Saint

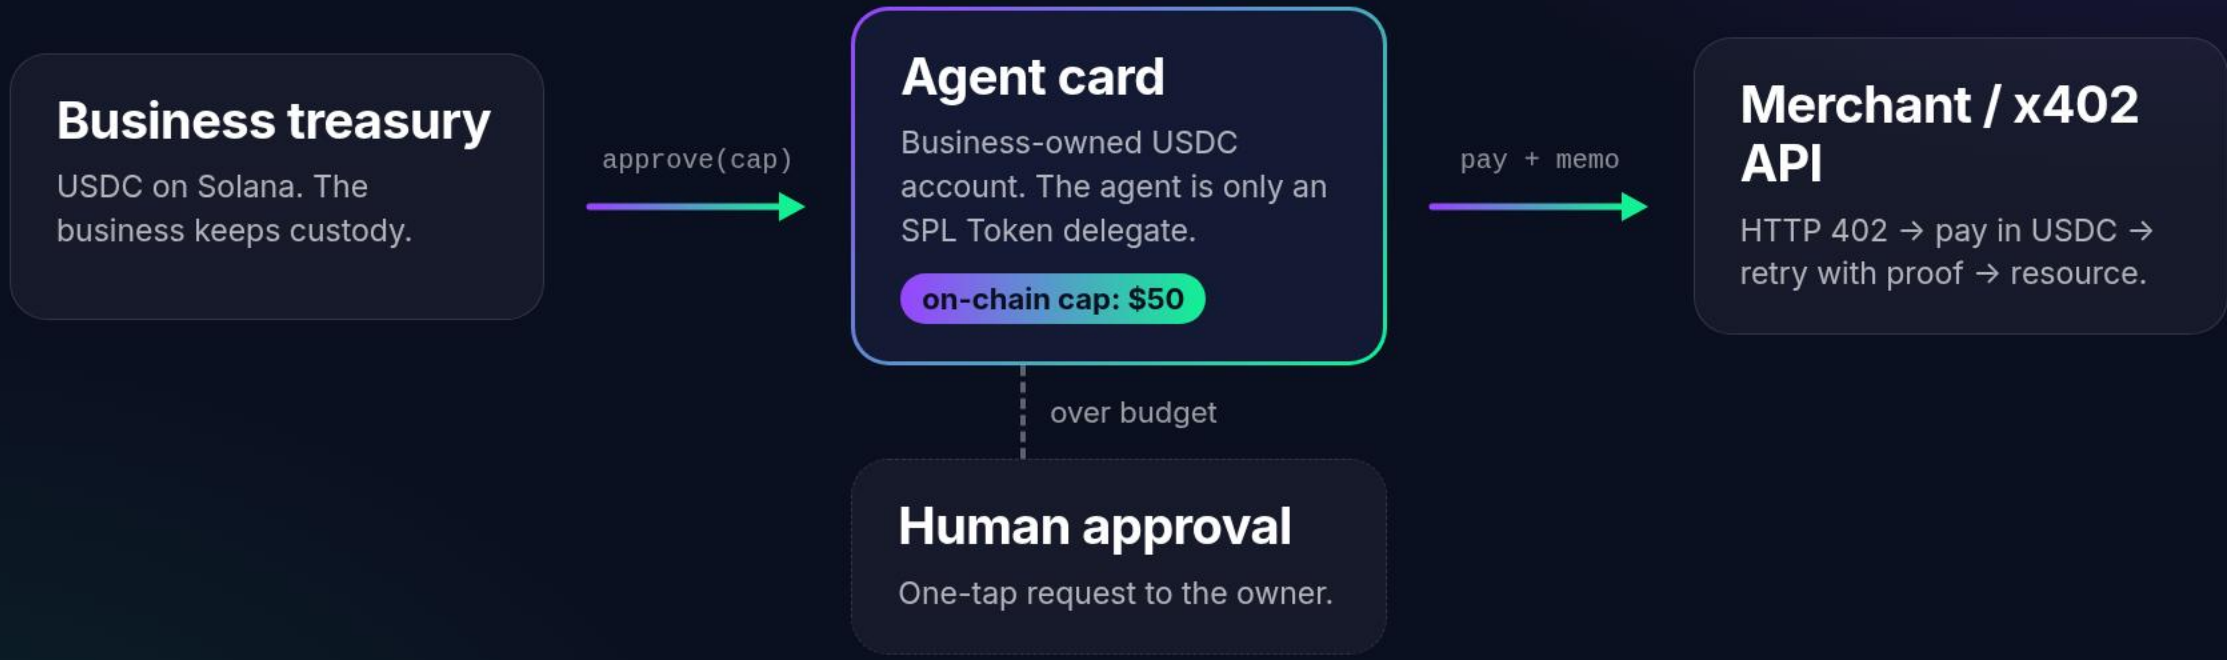

AI employees for small businesses. We hit this problem ourselves.

### Encode Club

Developer education and hackathon community in London. We know the people building agents.

HOW IT WORKS

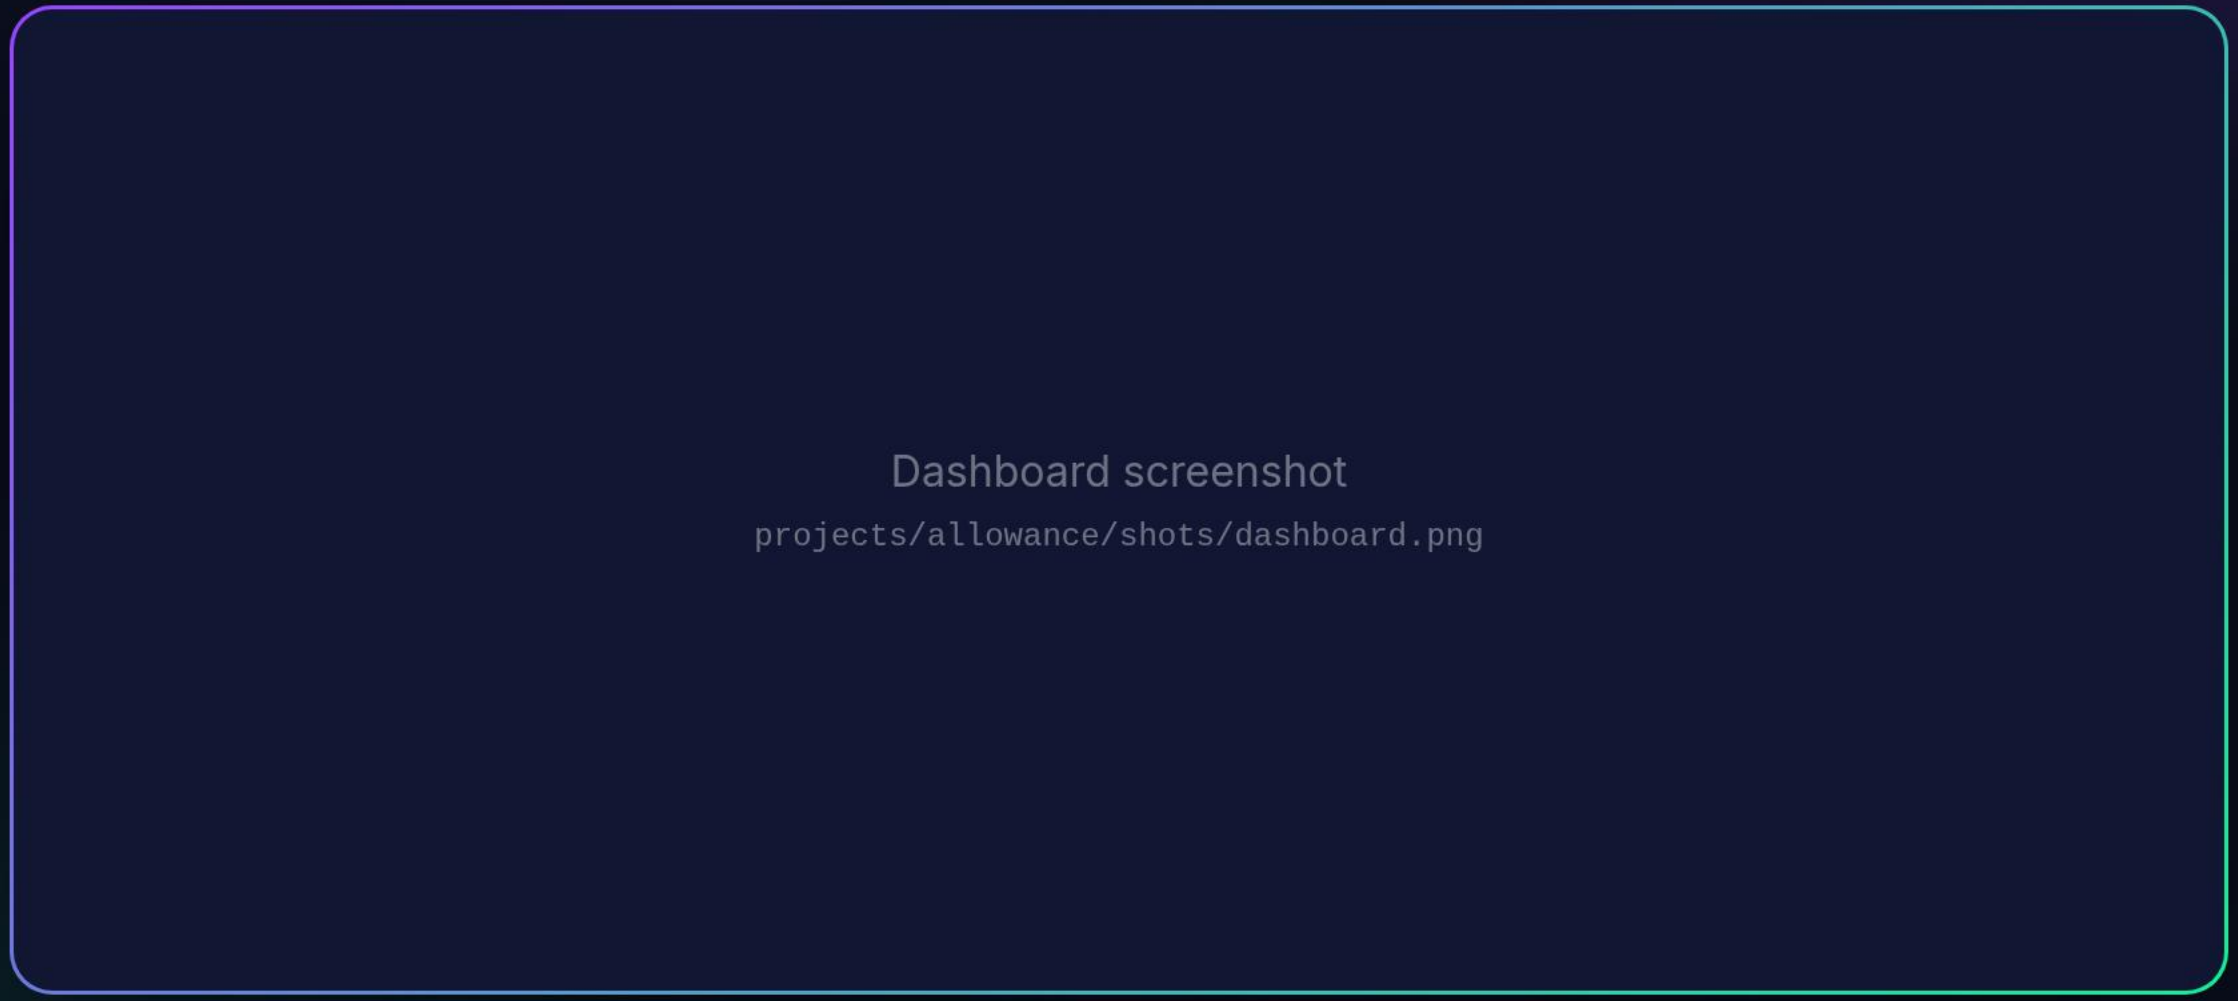

# Each agent gets its own card. The chain enforces the limit.

- Overspend → rejected on-chain
- Revoke instantly
- Memo receipts + CSV ledger
- Fees sponsored: no SOL needed

# The dashboard

allowance.olivia.saint.work · devnet, no real money

WHY SOLANA

# Fast, cheap, USDC-native. And the limit is a token standard.

**~400ms**

finality[1]: agents pay and carry on

**$0.00025**

per transaction[1]: pay-per-request works

**$11B+**

stablecoins in circulation on Solana[1]

**SPL delegate**

approve / revoke allowances are built into the audited SPL Token program

**x402**

HTTP 402 payments already live on Solana: 35M+ transactions since launch[1]

**0 SOL**

fees sponsored, so agents never need to hold SOL

[1] Solana Foundation, "What is x402?", solana.com/x402/what-is-x402 (accessed 12 Oct 2026).

MARKET

# Every agent will need a budget.

**$3–5T**

global agentic commerce orchestrated by AI agents by 2030[1]

**$52.6B**

AI agents market by 2030, growing 46.3% a year[2]

**$390B**

real stablecoin payments a year, more than doubled since 2024[3]

BUSINESS MODEL & GO-TO-MARKET

# Priced like a seat. Grows with spend.

## PRICING (PLANNED)

### Free

1 agent, up to $250 a month of agent spend

For builders and hackathon teams.

### Business

$10 per agent / month + 0.5% of agent spend

Per-seat matches how small businesses buy AI employees; the spend share grows with value. To be tested with design partners.

## GO-TO-MARKET

1. **Saint's own AI employees**
   First user: internal, not external traction
2. **Encode Club developers & hackathons**
   Reach the people building agents
3. **SDK + MCP server for agent frameworks**
   A budget any agent can plug into
4. **x402 merchants & APIs**
   Where agents already pay in USDC

TEAM

# Building for agents we already run.

THE ASK

# Give your agents an Allowance.

- A place in the Colosseum accelerator
- Honest feedback
- Design partners: businesses running AI agents
